Dear fellow amateur,

The Badger Amateur Radio Society has been busy during the past year. We launched a balloon-supported vertical antenna for 160 meters. In June, a gasoline generator powered our field day setup on picnic point. W9YT is the net control station for the Badger Emergency Net on Wednesday nights, and each month a communications exercise is run for the Selective Service System.

Last year, over forty members of the club made some 6000 contacts from our station in the basement of the Electrical Engineering Building. MARS station A9YT controls one Army MARS net, and has been very active on military traffic networks this summer. We have also reconditioned the equipment, relocated the beam, and repainted the shack during the summer months.

We are looking forward to another successful year of operation. Although you probably have other activities to keep you busy, you are cordially invited to attend our meetings, and if you wish, join the club. The first meeting of the semester will be held in Room 142, Electrical Engineering Building, at 7:30 P.M., Wednesday, September 18, 1963. We would be glad to see you there.

Sincerely yours,

BADGER AMATEUR RADIO SOCIETY, W9YT

John Koster, W9 DDR, President
Phil Goetz, K9E LT, Vice-President
